

A single, hands-on day that takes your team from a live demonstration to a de-risked deployment plan — designed to leave the room confident that the **design is sound**, the **demo is real**, and the **rollout is feasible**. Run as a touch-and-feel experience: posters, printed packets, rule cards, and a live lab — not a slideshow.

1 Day 9:00 – 4:30	11 SESSIONS	6 HANDS-ON PROPS	8–12 wk TO GO-LIVE	\$0.032 PER REFERRAL
----------------------	----------------	---------------------	-----------------------	-------------------------

AGENDA — SESSION, GOAL & COLLATERAL

TIME	SESSION · GOAL · COLLATERAL
9:00 30 min	 Welcome & Objectives Frame the problem, agree what “good” looks like, set the decisions to walk out with. Collateral: printed agenda run-sheet · objectives & “what good looks like” worksheet · attendee name cards
9:30 45 min	 Live Demonstration  The centerpiece — the agent processes real referrals end-to-end. The “is it real?” moment, answered on screen. Collateral: printed referral packets · QR card to the live demo (Railway URL) · laptop/tablet stations · “what you just saw” recap card
10:15 30 min	 How It Works — Architecture & Workflow Multi-channel intake, AI extraction, the OWL rule engine, completeness checks and routing. Collateral: architecture + workflow poster (foam board) · data-flow one-pager · 25-field episode-record sample
10:45	 Break (15 min)
11:00 40 min	 Trust & Human-in-the-Loop Four-layer hallucination defense, confidence thresholds, escalation/review queue, full audit trail. Collateral: four-layer-defense one-pager · sample audit-trail printout · escalation-queue screenshot card
11:40 40 min	 Integration & Knowledge Graph  Connecting to fax, voice, portals and case-management/EHR — API, RPA or file. No rip-and-replace. Collateral: deck of 24 CMS rule cards · integration-patterns one-pager · knowledge-graph poster
12:20	 Lunch (50 min)
1:10 40 min	 Security, Compliance & Enterprise Readiness PHI boundaries, HIPAA, BAA, access control, audit logging, retention. Clears the #1 blocker. Collateral: HIPAA/PHI checklist · draft BAA summary · security-architecture one-pager
1:50 40 min	 The Business Case & ROI Real token economics — \$0.032/referral at scale — vs. time saved and throughput. Collateral: ROI calculator handout (editable) · token-economics one-pager · cost-per-referral card
2:30	 Break (15 min)
2:45 40 min	 Deployment & Rollout Plan  Environments, the 8–12 week timeline, shadow-mode pilot, how the agent gets smarter with your data. Collateral: 8–12 week timeline poster · environment & integration checklist · deployment runbook outline

3:25

30 min

 **Roadmap & Agent Ecosystem**

Beyond intake: the 8-agent value chain — scheduling next. A platform, not a point solution.

Collateral: 8-agent value-chain poster · roadmap one-pager · scheduling-agent teaser card

3:55

35 min

 **Decisions, Owners & Next Steps**

Lock pilot scope, success metrics, owners and dates. Leave with commitments, not just impressions.

Collateral: decision log & owners (RACI) sheet · pilot-scope sign-off form · success-metrics worksheet

MAKE IT TANGIBLE — PROPS

- ◆ **Poster walls, not slides** — architecture & value chain on foam boards; sticky-note gallery walk.
- ◆ **Printed referral packets** — mark up by hand, then watch the agent process the same one.
- ◆ **Knowledge-graph rule cards** — sort the 24 CMS rules, then see them fire in the agent.
- ◆ **Live lab** — run the agent yourself (laptops + QR); “stump” it, watch the escalation gate.
- ◆ **Build-it-live** — a rule change pushed live in the room, on the public site minutes later.
- ◆ **Fill the episode record** — 25 fields by hand vs. the agent’s auto-fill. Feel the gap.

EVERY CONSIDERATION, COVERED

- **Security & compliance** — PHI, HIPAA, signed BAA, encryption, access, audit, retention.
- **Trust & quality** — accuracy targets, confidence gates, human review, failure handling.
- **Integration** — fax/voice/portal in; EHR & case-mgmt out; API/RPA/file.
- **Operations** — monitoring, SLAs, on-call, runbooks, throughput at scale.
- **Commercials** — pricing, ROI baseline, token cost, pilot vs. production.
- **Change management** — training, parallel-run, manual fallback, adoption plan.

FROM WORKSHOP TO GO-LIVE — IMPLEMENTATION ROADMAP

JUN 10

Workshop & Align

Demo + decisions; pilot scope locked; security review kicked off.

WEEKS 1–2

Integration Discovery

Fax/portal mapping; case-mgmt API; PHI boundary; payer-rule inventory.

WEEKS 3–5

Environment Setup

Infra; API connectivity; BAA + HIPAA config; KG customization.

WEEKS 6–8

Test & Validate

Real referral testing; ICD accuracy; escalation tuning; training.

WEEKS 9–12

Pilot & Go-Live

Shadow-mode pilot; live processing; monitoring + SLAs; handoff.

MATERIALS & COLLATERAL CHECKLIST

 Posters (foam board)

- ☐ Architecture + technical workflow
- ☐ 8-agent value chain
- ☐ Knowledge-graph / rule engine
- ☐ 8–12 week deployment timeline

 Cards & tactile props

- ☐ Deck of 24 CMS rule cards
- ☐ Printed referral packets (marked-up set)
- ☐ 25-field episode-record cards
- ☐ QR cards to the live demo

 Handouts / leave-behinds

- ☐ This agenda run-sheet
- ☐ Data-flow + four-layer-defense one-pagers
- ☐ HIPAA/PHI checklist + draft BAA summary
- ☐ ROI calculator + token-economics one-pager
- ☐ Roadmap one-pager

 Stations & sign-offs

- ☐ Laptops/tablets on the live demo
- ☐ Decision log + owners (RACI) sheet
- ☐ Pilot-scope sign-off form
- ☐ Success-metrics worksheet

SUCCESS CRITERIA WE’LL AGREE ON

 % auto-processed without human touch

 Handling time reduced

 Extraction accuracy %

 Time-to-first-response

 Cost per referral

 Throughput at peak
