

CLIENT WORKSHOP · FACILITATOR PLAYBOOK

Design → Demo → Deploy — Run-of-Show**June 10, 2026**

Coastal DME · Workers' Comp DME Referral Intelligence

WORKSHOP DAY

A section-by-section playbook for the facilitator. Each session gives the **Goal**, **The Play** (how you run it), the **Collateral** to have ready, and a **Tip**.

Hands-on markers: 🧪 **Live Lab** · 🗂️ **Card Sort** · ⚙️ **Build Live**. Breaks at 10:45 & 2:30; lunch 12:20 (good for 1:1 security/IT questions).

9:00 · 30m 🗂️ **Welcome & Objectives**

GOAL Shared definition of success; agree the decisions to leave with.

PLAY Open with the client's own pain (backlog, rekeying). Put a "What does good look like?" poster up; each attendee posts one outcome on a sticky note. Group them live — that becomes the day's scorecard.

COLLATERAL printed agenda run-sheet · objectives worksheet · attendee name cards · sticky notes + markers.

TIP Don't demo yet. Make *their* goals the frame everything else pays off against.

9:30 · 45m ▶ **Live Demonstration** 🧪 **LIVE LAB**

GOAL The "is it real?" moment — answered on screen, on their data.

PLAY Run a real referral packet end-to-end (extraction → ICD conflict → gap detection → outreach → routing). Hand out printed copies of the same packet; attendees scan the QR and run one at the stations.

COLLATERAL printed referral packets · QR cards to the live demo (Railway URL) · laptop/tablet stations · recap card.

TIP Use a packet with a deliberate gap so gap-detection visibly fires — that's the credibility builder.

10:15 · 30m ⚙️ **How It Works — Architecture & Workflow**

GOAL Show the design is principled, not a black box.

PLAY Gather at the architecture poster. Trace one referral's path with your finger: intake → AI extraction → OWL rule engine → completeness → route. Tie each stop to what they just saw.

COLLATERAL architecture + workflow poster (foam board) · data-flow one-pager · 25-field episode-record sample.

TIP Keep it a *walk-the-wall*, not slides. Let them point and ask.

🕒 **Break · 10:45 · 15 min****11:00 · 40m** 🛡️ **Trust & Human-in-the-Loop**

GOAL Answer "can we trust it?" head-on.

PLAY Walk the four-layer-defense one-pager, then live-trigger a low-confidence case so the agent stops and routes to the human queue. Pass around a printed audit trail for one episode.

COLLATERAL four-layer-defense one-pager · sample audit-trail printout · escalation-queue screenshot card.

TIP "Stump the agent" — invite a tricky case. When it escalates instead of guessing, trust is earned.

11:40 · 40m 🗨️ Integration & Knowledge Graph CARD SORT**GOAL** Prove it fits their stack with no rip-and-replace.**PLAY** Hand each table the 24 rule cards; sort by payer/scenario. Show the same rules firing in the agent. Walk the integration one-pager (API/RPA/file) against their systems.**COLLATERAL** Deck of 24 CMS rule cards · integration-patterns one-pager · knowledge-graph poster.**TIP** Capture which intake channels and case-mgmt/EHR they use — it seeds the Discovery phase.

🍴 Lunch · 12:20 · 50 min — informal time for security/IT to ask the hard questions 1:1

1:10 · 40m 🏢 Security, Compliance & Enterprise Readiness**GOAL** Clear the #1 blocker — PHI/HIPAA.**PLAY** Work the HIPAA/PHI checklist line by line; walk the data-boundary diagram (PHI never leaves their boundary); hand the security lead the draft BAA summary to take away.**COLLATERAL** HIPAA/PHI checklist · draft BAA summary · security-architecture one-pager.**TIP** Get the security/IT stakeholder in the room for *this* slot. Their yes unblocks everything.**1:50 · 40m 💰 The Business Case & ROI****GOAL** Turn “impressive” into “justified.”**PLAY** Plug their volume into the ROI calculator live; show \$0.032/referral against time saved and throughput. Let them see the payback on their own numbers.**COLLATERAL** ROI calculator handout (editable) · token-economics one-pager · cost-per-referral card.**TIP** Ask for monthly referral volume up front so the number on screen is *theirs*.

🕒 Break · 2:30 · 15 min

2:45 · 40m 🚀 Deployment & Rollout Plan BUILD LIVE**GOAL** Make the path concrete and low-risk.**PLAY** Walk the 8–12 week timeline poster (Discovery → Setup → Test → Pilot/Go-Live). Then build live: make a small payer-rule tweak and push it — show it on the public site minutes later.**COLLATERAL** 8–12 week timeline poster · environment & integration checklist · deployment runbook outline.**TIP** Pre-stage the change so the live build is quick and can't flop in the room.**3:25 · 30m 🗺️ Roadmap & Agent Ecosystem****GOAL** Show it's a platform, not a point tool.**PLAY** Reveal the 8-agent value-chain poster; mark Agent 1 (intake) live, scheduling next. Invite them to point at which agent solves their next-biggest pain.**COLLATERAL** 8-agent value-chain poster · roadmap one-pager · scheduling-agent teaser card.**TIP** Let their priority shape the roadmap order — co-ownership drives the deal.

3:55 · 35m **Decisions, Owners & Next Steps**

GOAL Walk out with commitments, not impressions.

PLAY Fill the decision log on the wall: pilot scope, success metrics (from the morning stickies), named owners, dates.
Get a signature on the pilot-scope sign-off.

COLLATERAL decision log + owners (RACI) sheet · pilot-scope sign-off form · success-metrics worksheet.

TIP Nothing leaves the room without an owner and a date next to it.
