

MARKET LANDSCAPE · COMPETITIVE SCAN

AI-Native Companies in Healthcare Claims

Compiled June 2026 · US-centric · companies built AI-first (legacy RCM incumbents — Optum, R1, Waystar — excluded). "AI-native" is a spectrum; funding figures are point-in-time.

★ = most relevant to an intake / referral + payer-call use case.

1 • Claims intake, referral & payer-call automation

- ★ **Tennr** — AI for the patient referral/intake front office: document intake + voice AI that auto-calls payers for benefits, follow-up, confirmations. ~10M docs/mo; \$101M Series C (~\$605M valuation). Closest analog to an intake agent.
- ★ **Infinitus** — purpose-built voice AI for payer-facing work: eligibility, prior auth, claim status, EOB retrieval, appeals, phone submissions. 150+ data points/call.

2 • Autonomous medical coding (charts → claims)

- **Fathom** — autonomous coding for high-volume specialties (ED, radiology, primary care, surgery). #1 "Reducing the Cost of Care," 2025 KLAS Emerging Solutions.
- **CodaMetrix** — autonomous coding for hospitals/health systems; uses the longitudinal patient record (CMX CARE) for context.
- **Nym Health** — semantic "clinical language" autonomous coder; strong ED product; Epic Showroom "Fully Autonomous Coding."
- **Arintra** — charts → claims at ~96% accuracy; ~43% fewer coding denials, ~11% less undercoding.
- **RapidClaims · MediCodio · Maverick Medical AI** — newer AI-native coding / claims-automation entrants.

3 • Provider RCM, claims automation & denials

- **Candid Health** — full claims-lifecycle automation; 200+ orgs; >95% touchless claims reported.
- **Adonis** — AI orchestration + agents for RCM/denials; \$40M Series C ('26), >\$95M total; automated appeals save ~\$200–500 each.
- **AKASA** — generative AI across the revenue cycle (prior auth → CDI → coding → claims), trained on each system's own data.
- **Sohar Health** — API-first front-end RCM (eligibility + claim accuracy), ~95% automation.
- **Syntra · Taiga · LunaBill** — AI billing/claims for private practices; LunaBill = voice AI for billing follow-up calls.
- **Aegis** — automates insurance denial appeals end-to-end for providers.

4 • Prior authorization

- **Cohere Health** — market leader; ~47M payer-provider interactions/yr, 85% real-time approvals; ~\$200M raised; expanding into payment integrity.
- **Anterior** (fmr. Co:Helm) — AI for health plans: prior auth, payment integrity, risk adjustment; \$40M raised; deployed at payers (e.g., Geisinger).

5 • Payer-side: payment integrity & claims adjudication

- **Machinify** — unified pre-pay + post-pay payment-integrity platform across the claim lifecycle.
- **Anomaly (Anomaly Insights)** — AI payer-intelligence for denials/underpayments/adjudication deviations; +\$17M ('26); 20+ health systems.
- **Alaffia Health** — AI + clinicians for end-to-end claims ops (utilization mgmt, payment integrity, appeals).
- **Curacel · Amara** — AI claims processing/automation for payers & TPAs; Amara structures messy PDF/EDI/non-standard claim inputs.

6 • Consumer / patient-side denial appeals

- **Counterforce Health** — free AI appeal-letter generator; ~70% appeal success; copies state regulators on filings.
- **Claimable** — AI appeals (~\$40/letter); signing deals with drugmakers/health systems to appeal on patients' behalf.
