

MARKET LANDSCAPE · PAYER-FOCUSED COMPETITIVE SCAN

AI-Native Companies for Medical Health-Insurance Payers

Compiled June 2026 · Scope: US medical health plans (commercial / Medicare Advantage / Medicaid) — payer side only. Excludes provider RCM/coding/intake, consumer tools, and workers' comp. AI-first companies (legacy incumbents — Optum, Cotiviti — excluded). Point-in-time.

Managed services? **Yes** = runs the process (managed / BPaaS) · **Hybrid** = software + managed option · **No** = software the plan operates. Clients shown are publicly disclosed; "not public" = undisclosed.

1 • Prior authorization & utilization management

- Cohere Health** — category leader for PA/UM; auto-approves up to ~90% of requests; ~12M PA/yr; expanding into payment integrity. Managed services: **Hybrid** — software + delegated managed (Cohere Complete™). Clients: Humana (national MA + Commercial), Geisinger Health Plan, CMS; ~660K providers.
- Anterior** (fmr. Co:Helm) — AI for health-plan back office: prior auth, payment integrity, risk adjustment; \$40M raised. Managed services: **No / unconfirmed** — payer back-office automation. Clients: Geisinger Health Plan (others not public).
- Basys.ai** — enterprise generative AI spanning prior auth, UM, and payment integrity for health plans. Managed services: **No** — genAI automation platform. Clients: health plans (names not public).
- Itiliti Health** — prior-authorization automation for payers (API/interoperability, CMS-0057 compliance). Managed services: **No** — software/API platform. Clients: payers & providers (names largely not public).

2 • Payment integrity & payment accuracy

- Machinify** — unified pre-pay + post-pay payment-integrity platform across the claim lifecycle. Managed services: **Hybrid** — platform + recovery services. Clients: national/regional health plans (names not public).
- Codoxo** — genAI "Unified Cost Containment"; "Point Zero" intervenes pre-claim; 80M+ lives. \$69M raised (\$35M Series C led by CVS Health Ventures, Dec '25). Managed services: **Hybrid** — provider education, prepay editing, fraud detection, audit, record review. Clients: large US health plans (CVS Health Ventures-backed; names not public).
- Lyric** (lyric.ai) — AI payment-accuracy for health plans; reviews >50% of US claims (~190M Americans). *AI-forward; legacy roots in ClaimsXten*. Managed services: **Hybrid** — payment-accuracy platform + services. Clients: major national health plans (~190M lives; names not public).
- ClarisHealth** — Pareo® payment-integrity platform for health plans (recoveries + admin-cost reduction). Managed services: **No** — enterprise software platform. Clients: regional & national health plans (names not public).
- Rialtic** — AI clinical & payment-policy engine for payers (payment integrity / claims editing). *Lighter public detail*. Managed services: **Hybrid** — policy/editing platform. Clients: health plans (not public).

3 • Claims operations & adjudication automation

- Alaffia Health** — AI + expert clinicians for end-to-end health-plan claims ops (UM, payment integrity, appeals); \$55M Series B (Feb '26). Clearest AI-native BPaaS for payers. Managed services: **Yes** — both software subscriptions and managed services; runs bill/chart reviews for plans. Clients: Medicaid, Medicare Advantage & commercial plans (≤2M members), TPAs, cost-containment firms, gov agencies.
- ClaimSphere** — AI engine that auto-adjudicates claims against payer benefit logic, clinical edits, and COB with no human touch. Managed services: **No** — adjudication automation engine. Clients: payers (names not public).
- Amera** — automates claims processing for payers: messy PDF / EDI / non-standard submissions → structured, system-ready data. Managed services: **No** — claims-processing software. Clients: health-insurance payers (names not public).
- Curacel** — AI claims processing/automation & fraud detection for payors & TPAs (*strong in emerging markets — lower fit for a US-only scan*). Managed services: **No** — claims infrastructure/software. Clients: payers, TPAs, providers (names not public).

4 • Risk adjustment & coding accuracy (payer)

- Reveleer** — AI risk-adjustment + quality/HEDIS for health plans; EVE™ maps missed diagnoses to HCCs at ~99% accuracy; record retrieval up to 80% faster. Managed services: **Hybrid** — AI platform + retrieval/coding services (~3x ROI in year one). Clients: health plans & risk-bearing providers (names largely not public).
- Pareto Intelligence** — payer risk-adjustment & analytics (Pareto Hub data environment + actuarial/analytics services). Managed services: **Hybrid** — analytics platform + services. Clients: health plans (names not public).

At-a-glance — who runs the process for payers

Yes (managed / BPaaS): Alaffia Health.
Hybrid (software + delegated/managed): Cohere Health, Machinify, Codoxo, Lyric, Rialtic, Reveleer, Pareto Intelligence.
No (software the plan operates): Anterior, Basys.ai, Itiliti Health, ClarisHealth, ClaimSphere, Amera, Curacel.

Strategic read: even on the payer side, most AI-natives ship **software**; only **Alaffia** (and Cohere's delegated option) truly *run* the operation. The "large service provider that operates payer claims ops with AI inside" lane is largely open — a differentiator worth naming.
